

ENERGY ACTION MONTH 2024

POWERING THE MISSION

From installations to the battlefield, the U.S. Army is **#PoweringTheMission**

RESILIENT

700+ MW

Of renewable energy generation capacity, reducing fossil fuel related supply disruption risks to installations and increasing available energy for local communities.

TRANSFORMATIVE

45%

Fuel savings increases operational reach and lethality through efficient power systems by leveraging AMMPS generators and microgrids.

INNOVATIVE

31

Operational microgrids implemented on U.S. Army installations using all available acquisition authorities.
